

HYSILK110 HYSILK110BLT

[megAsept]

Antibacterial silicon keyboard with touchpad,
fully sealed and backlight (opt.)

- 110 keys with numpad (HYSILK110)
- 110 keys with numpad + backlight-function (HYSILK110BLT)
- Backlight on / off switch, keyboard on / off switch
- Touchpad with scroll function
- Optional switchable numpad
- Silicone surface with nanosilver particles repels dirt and bacteria
- Complete sealing of the surface enables immersion in water / disinfectant solution and at the same time protects against the ingress of dust and dirt (IP68)
- Suitable for as sterile environments as possible (e.g. operating room)
- Novel, particularly soft keystroke
- QUERTZ / german keyboard layout (other layouts on request)
- Available in white (other colors on request)

Technical Information

Dimensions	346mm x 136mm x 47mm (LxWxH)
Keyboard Layout	QUERTZ / German
Key path	Reduced stiffness
Sealing	Membrane
Connection	USB incl. Silicone cap for protection during cleaning
Water resistance	100% water resistant
Antimicrobial Properties	Resistant to 99.9% of all surface bacteria

Specifications subject to change without notice. For errors, technical mistakes and misprints no liability is assumed.
