

Compact, antibacterial silicon keyboard with touchpad and fully sealed housing

- 86 keys with touchpad
- Multi-finger touchpad with scroll function
- On-off switch
- Silicone rejection with nanosilver particles repels dirt and bacteria
- Complete sealing of the surface enables immersion in water / disinfectant solution and at the same time protects against the ingress of dust and dirt (IP68)
- Suitable for as sterile consequences as possible (e.g. operating room)
- Layout: QWERTZ / german (other layouts on request)
- Available in white

## Technical Information

Dimensions	298mm x 213mm x 11mm (LxWxH)
Layout	QWERTZ / German
Key path	Reduced stiffness
Sealing	Membran
Ports	USB incl. Silicone cap for protection during the cleaning
Water resistance	IP68; 100% water resistant
Antimicrobial Characteristics	Resistant to 99.9% of all surface bacteria
