

Compact, antibacterial silicon keyboard with completely sealed housing

- 88 keys
- Silicone surface with nanosilver particles repels dirt and bacteria
- Complete sealing of the surface allows immersion in water / disinfectant solution and at the same time protects against the ingress of dust and dirt (IP68)
- Suitable for environments that are as sterile as possible (e.g. operation room)
- Available in white (other colors on request)
- QWERTZ layout

Technische Angaben

Dimensions	272mm x 135mm x 12mm (LxBxH)
Layout	QWERTZ (German)
Tastenweg	Reduced stiffness
Sealing	Membran
Connection	USB incl. Silicone cap for protection during cleaning
Water resistance	100% water resistant
Antimicrobial Properties	Resistant to 99.9% of all surface bacteria
